(10 letters)

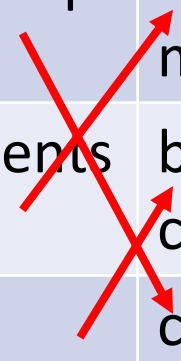

# PRE-WRITING

- 1** Match the suggestions for improving the environment with their expected results.

Suggestions	Expected results
1. Cleaning up regularly (e.g. organizing clean-up activities at weekends)	a. This reduces CO2 and makes the air clean.
2. Planting more trees (e.g. encouraging students to plant trees or flowers in their school)	b. This makes the waste collection easier.
3. Setting up more rubbish bins (e.g. putting more rubbish bins in public places such as parks or bus stations)	c. This keeps the environment clean and makes it safe for everyone.

# WHILE-WRITING

- 2** Read the incomplete paragraph about ways to improve the environment. Fill in the blanks with the words and phrases from the box.

Sharks are a group of fish characterized by a cartilaginous skeleton, five to seven gills, and pectoral fins that are not fused to the head. Today's sharks are classified within the *Selachimorpha* clade, a sister group to the rays. However, the term "shark" has also been used for extinct members of the subclass Elasmobranchii outside the *Selachimorpha*, such as *Cladoselache*. Under this broader definition, the earliest known sharks date from more than 420 million years ago.

# POST WRITING

## 2 Class correction

### ***Sample answer:***

Another way would be to plant more trees. For example, we can plant more green trees around the school and in the schoolyard. It reduces CO<sub>2</sub> and makes the air we breathe in cleaner. Finally, we can set up more rubbish bins. For instance, we can put more bins in public places such as parks or bus stations. This makes the waste collection easier.
